

## How to crop an image in Picasa while maintaining a specific aspect ratio:

1. Right click on your image and select Open with > Picasa photo viewer

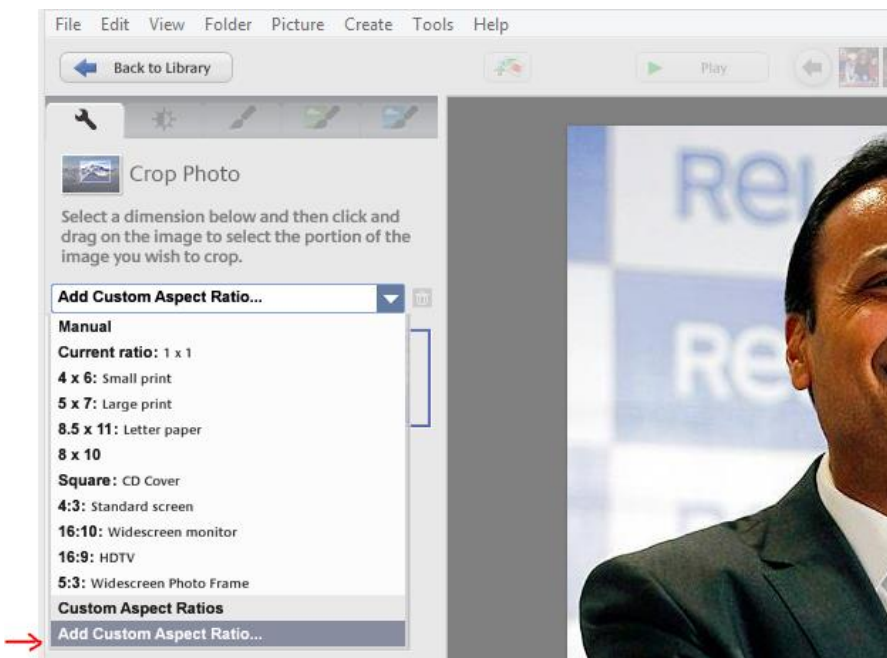

2. Once you have your picture open, right click one more time and select Edit in Picasa

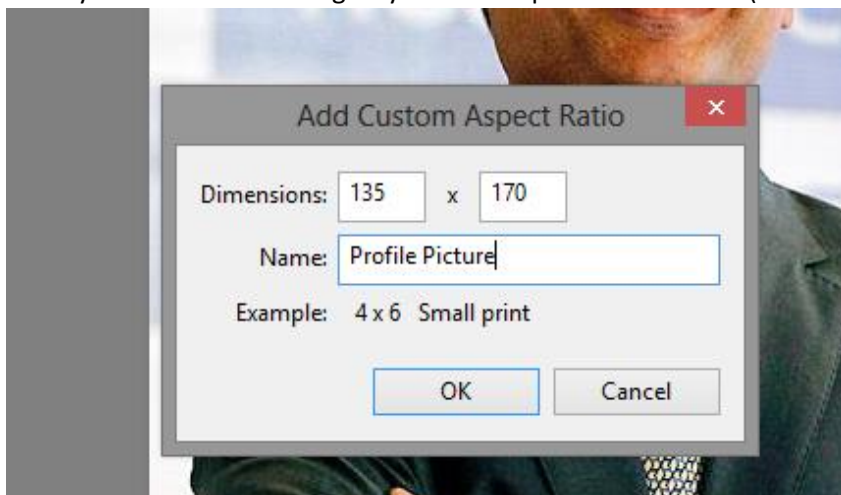

### 3. Select Crop

### 4. Choose one of the ratios from the dropdown or Add Custom Aspect Ratio to enter your own ratio

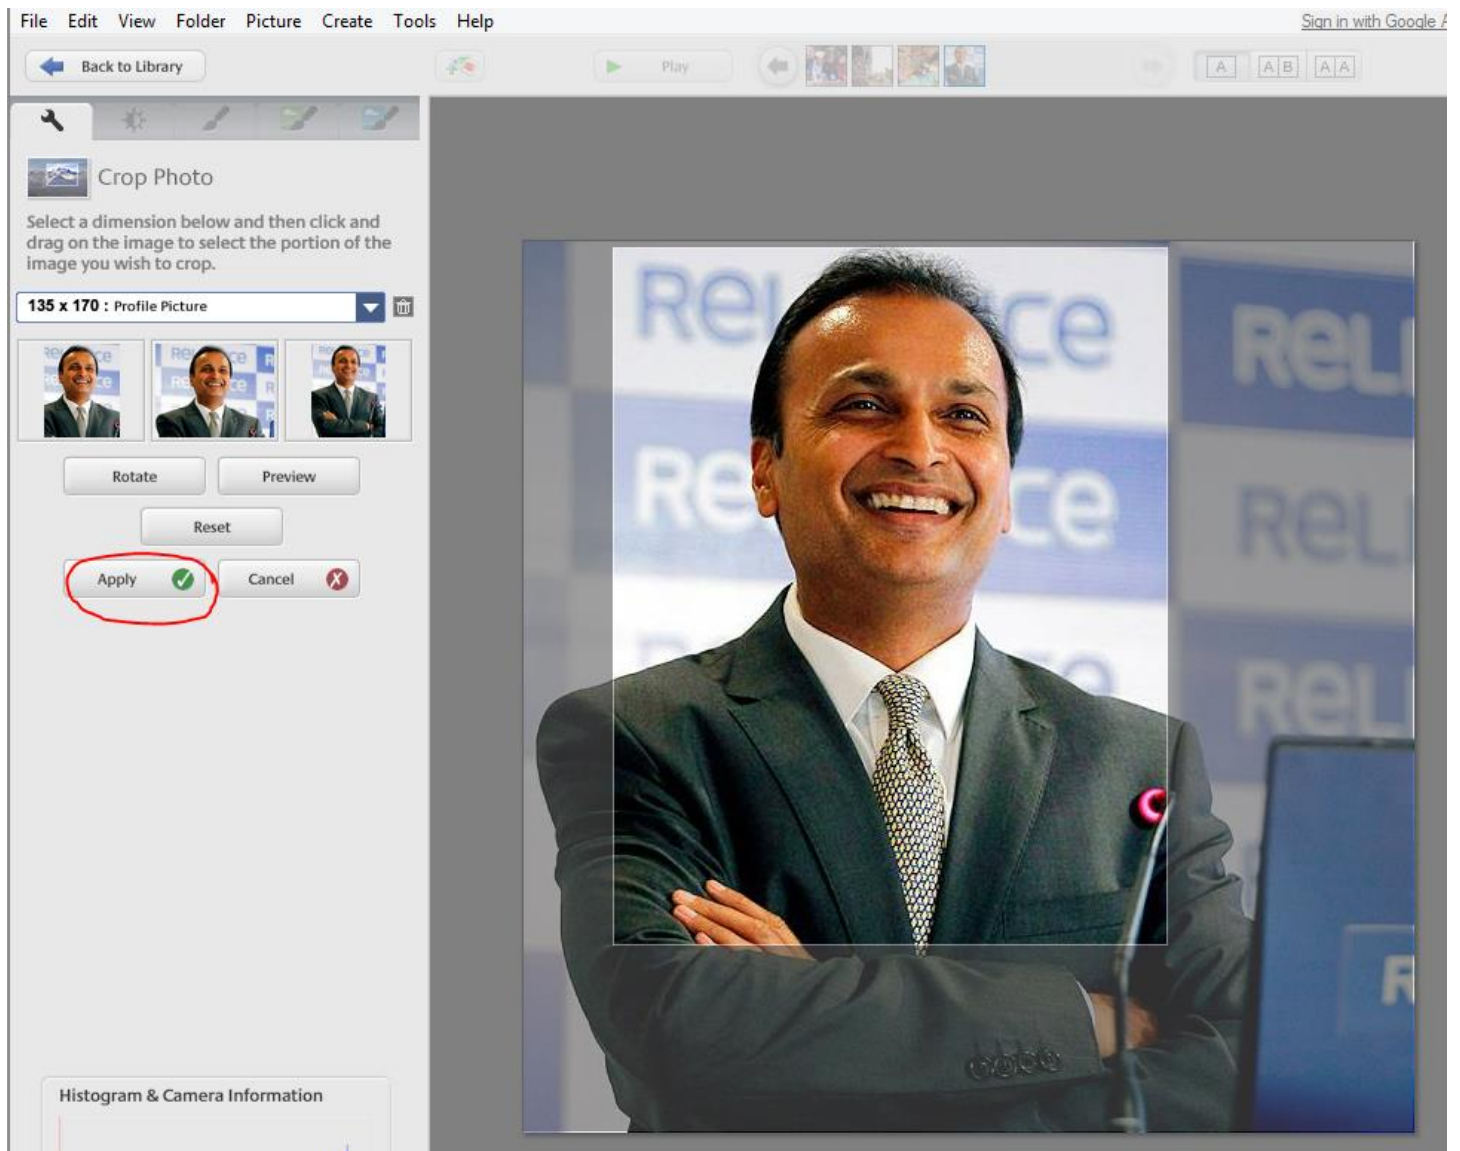

### 5. Enter your dimensions and give your new aspect ratio a name (Width x Height) then click OK

6. From now on, it's going to become one of your options in the dropdown (You can select it whenever you're cropping a Profile picture)

7. Click and drag your cursor to the desired area. Once you are satisfied with the way it looks, click Apply.

8. Click File > Save as to save your new image.
